

2022 Call for Data Submission Announcement

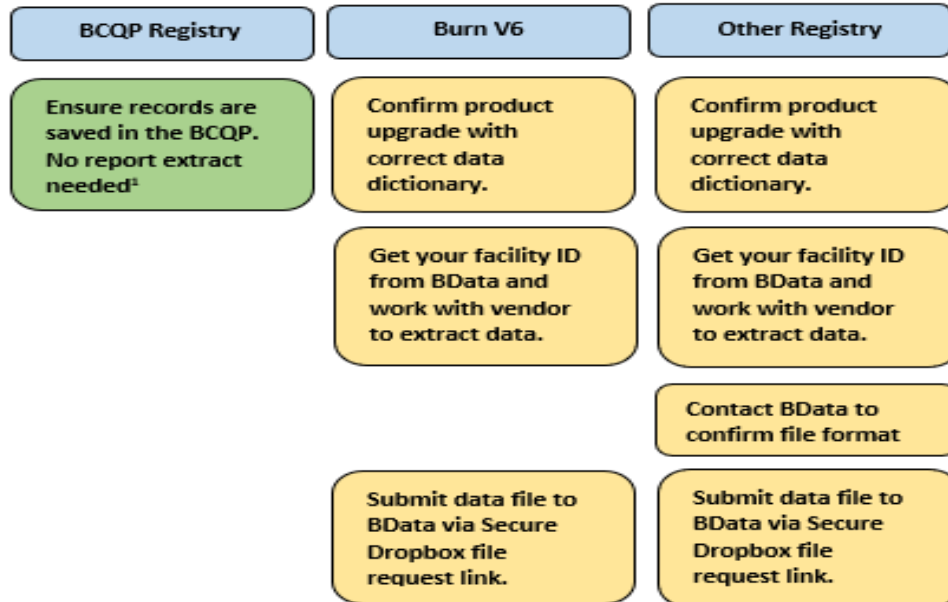

OPEN for SUBMISSIONS: Thursday, January 20, 2022

DEADLINE: Friday, April 29, 2022

The American Burn Association (ABA) announces its annual Call for Data Submission. The de-identified data are used to create the annual summary report chart pack, aggregate and benchmark reports on the [Burn Care Quality Platform](#), updated risk-adjusted models, and the Burn Injury Summary Report (BISR). These products are valuable resources for clinical quality improvement and research within the burn care community, and they are only possible with your participation.

NEW DATE RANGE: Included in this call are data for all burn care cases treated at your burn facility with admission dates from **July 1, 2020 through December 31, 2021.**

Data submitted should adhere to the 2020 Burn Care Quality Data Dictionary and ABA file format specifications.

¹Burn Centers that have data in both the BCQP and an older registry system over the span of the reporting period (7/1/20-12/31/21) have several options available to complete the Call for Data. They can sign up for a historical data migration, follow the Burn V6 or Other Registry instructions for the relevant period, or retroactively enter patients into the BCQP data entry. Please contact support@bdatainc.com to talk through the options.

Thank you for your participation!

SUBMISSION PROCESS: All inpatient burn facilities are invited to submit data. Submissions will be accepted through the ABA's technology and analytics partner, BData. Data submission processes will vary by the data registry system utilized at your burn center (*see high level process on previous page*).

BCQP FULL PLATFORM USERS: Do not need to submit your burn center data since it is already included in the platform.

BCQ ANALYTIC ONLY USERS: Will need to submit your burn center data, per the instructions.

Non-BCQP files can be sent in one of three ways:

- (1) BData Secure Dropbox request
- (2) Secure Email
- (3) Burn Center initiated secure transfer method
